Stripe Secure Access Kit

Enabling Professional Payment Systems

• 1. WHY THIS IS SECURE

Using the **Stripe Team Feature** allows us to integrate your payment systems without you ever sharing your private login or password. You remain the account owner, and we receive "Developer" level access to handle technical configurations safely.

• 2. HOW TO INVITE US

1. Log into your **Stripe Dashboard** at dashboard.stripe.com.

2. In the top right, click the **Settings (Gear Icon)**.

3. Under the "Business Settings" column, click **Team**.

4. Click **+ New Member** in the top right.

5. Enter our agency email: **[YOUR EMAIL]**

6. Select the **Developer** role.

7. Click **Send Invite**.

• 3. INTEGRATION BENEFITS

Once we have developer access, we will activate the following for May's Homebridge:

- **Seamless Calendar Payments:** Clients pay instantly when booking their consultation.

- **Automated Invoicing:** Professional receipts sent automatically upon payment.

- **Secure Transactions:** Ensuring all data is handled via Stripe's world-class encrypted infrastructure.

4. NEXT STEPS

After you send the invite, please let us know. We will accept the invitation and begin the technical handshake between Stripe and your smart website immediately.
